

Sound Insulation Prediction Software

Instructions to Upgrade to INSUL 6.4 from an earlier version

Please contact your distributor for the cost of upgrading to version 6.4. It is assumed that you already have a usb key for an earlier version that is working and is installed. Separate instructions can be downloaded for upgrading your key.

Go to <http://www.insul.co.nz/download.html> and download the file marked Download version 6.4 (xxxxx version). Where xxxxx represents the country version you wish to install.

Before installing INSUL you should close any open applications and log on as a user with sufficient access rights to install programs. This normally means having Administrator rights.

Install INSUL

1. Unzip the files from the Insul64xxxx.zip file you have downloaded and copy the file Setup.exe to a temporary folder.
2. You should now install INSUL by double clicking on the file "Setup.exe".
3. Read the instructions on the Welcome page and click the next button.
4. Read the Software license Agreement and if you accept the terms of the licence, click the Yes button.
5. If you wish to read the INSUL release notes you may scroll down the Readme Information then click the Next button.
6. Type your name and the company name in the appropriate fields and click the Next button.
7. To choose a particular destination directory for INSUL's files click the Browse button. To accept the default destination directory click the Next button.

8. To change the Program folder where program icons will be stored enter a new folder name in the Program Folder field, otherwise leave the default folder name. Click the Next button.
9. If you are satisfied with the settings click Next to begin copying the necessary files.
10. You can now run the program from the normal Windows "Start ", "All Programs" menu.
11. You must now upgrade your usb key. See separate instructions on how to do this.
